JACKS & PLUGS

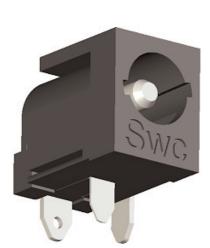

LOCKING RIGHT ANGLE POWER JACKS & PLUGS

Switchcraft's miniature Right Angle Locking Power Jack and Plug system is the perfect solution for PC board-mount applications where a quick-and-secure, space saving board mounting method is required. Similar in function to Swithcraft's durable 712 and 722 right-angle products that use precision tolerancing to hold plug and jack together, this system provides additional security by using keyed plugs and slotted jacks to firmly lock the components in place. It's quick, easy, and trouble free. Simply mate the plug to its matching jack, provide a slight hand-twist, and you're done! Available in a variety of configurations, Switchcraft's Right-Angle Locking Jacks and Plugs not only save time and space, but virtually eliminate accidental plug-to-jack decoupling.

FEATURES AND BENEFITS

- Quick, Secure, Compact Assembly: Keyed plugs and slotted jacks provide for a simple and efficient plug-to-jack coupling method. In addition, the jack's board-terminals have been engineered to allow for quick, trouble-free, PC board mounting while the right-angle design allows for a space saving assembly.
- **Durable Construction and Polished Appearance:** Jacks and Plugs are manufactured with high quality materials to maximize product life while providing for a quality appearance.
- Product Selection: Available in PC, Surface and Hybrid Mount configurations in 0.100" (2.5mm) and 0.080" (2.0mm) diameters. Plug tips are color coded for easy product distinction. Customs and variations are available, including tape and reel options. Consult factory for details.

PRODUCT SPECIFICATIONS

JACKS

Housing: Thermoplastic

PC Mount Terminals: Silver Plated Copper Alloy

Surface & Hybrid Mount Terminals: Tin Plated Copper Alloy

Handle Thread Size: 5/16-24 UNF 2B Center Pin: Nickel Plated, Copper Alloy

Current Rating: 5A

Contact Resistance: <50 mohms

Insulation Resistance: 30 megohms @100V DC Dielectric Withstanding Voltage: 250 VAC @ 1 minute

Lifecycle: 5,000 min.

Certifications: RoHS Compliant

PLUGS

Plug Pin & Gripring: Nickel-Plated Copper Alloy Finger Insulator Tip & Handle: Molded Plastic Sleeve Terminal: Copper Alloy, Electro-Tinned

Current Rating: 5A

Certifications: RoHS Compliant.
